To: Recipient <mihir.mithani121063@marwadiuniversity.ac.in>

Campus by ATRI Solutions 26-27 Batch

> Company Campus Drive Details

 **Company Name**
ATRI Solutions **Type of Company**
MNC Level **Campus Date & Time**
27 Jun, 2026 - Saturday 09:00 AM **Last Registration Date**
21 Jun, 2026 - Sunday**Venue**
Marwadi University

> Job Description

 **Job Profile**

1. Junior Software / AI-ML Engineer
2. Hardware Engineer
3. Mechanical Engineer
4. Firmware Engineer

 **Package (CTC)**
4.0 to 5.0 LPA **Work Location**
Ahmedabad/ Gandhinagar

Job Description

1. Junior Software / AI-ML Engineer

Responsibilities

- Conduct research in AI/ML, focusing on optimization, statistical modeling, and algorithm development.

- Develop and implement new mathematical techniques to enhance AI models.
- Analyze and improve publicly available AI/ML models, and write pseudocode for algorithms.
- Collaborate with software engineers, data scientists, and domain experts to integrate research outcomes.
- Analyze large datasets using advanced mathematical and statistical methods.
- Stay up to date with the latest advancements in AI/ML and apply them to research and development initiatives.

Requirements

- Strong knowledge of linear algebra, calculus, probability, and statistics.
- Proficiency in AI/ML programming languages and frameworks such as TensorFlow, PyTorch, and Scikit-learn.
- Solid understanding of machine learning fundamentals, optimization techniques, and model evaluation methods.
- Strong problem-solving, analytical, and communication skills.
- Experience in Computer Vision (CV), Natural Language Processing (NLP), or Reinforcement Learning (RL) is a plus.
- Familiarity with cloud platforms such as AWS and Azure.
- Ability to clearly communicate mathematical concepts, models, and pseudocode.

2. Jr. Hardware Engineer

Responsibilities

- Assist in schematic design and PCB layout using tools such as Altium, KiCad, or Eagle.
- Support firmware teams in hardware-software integration.
- Perform component selection, hardware testing, debugging, and validation.
- Assist in the development of digital and analog circuits, as well as prototype bring-up.
- Participate in design reviews, BOM preparation, and technical documentation.

Requirements

- Basic knowledge of electronic circuits, microcontrollers, and embedded systems.
- Familiarity with PCB design tools and laboratory instruments such as oscilloscopes, logic analyzers, and multimeters.
- Strong analytical, problem-solving, and communication skills.

Preferred Qualifications

- Knowledge of communication protocols such as UART, SPI, I2C, CAN, and Ethernet.
- Experience with debugging tools and JTAG.
- Understanding of EMI/EMC principles and DFM/DFT practices.
- Familiarity with firmware development is a plus.

3. Jr. Mechanical Engineer

Responsibilities

- Support mechanical design and development using CAD tools such as SolidWorks, AutoCAD, or CATIA.
- Prepare and review engineering drawings and technical specifications.
- Assist in prototyping, testing, and product improvement activities.
- Support material selection, tolerance analysis, and manufacturing process optimization.
- Coordinate with vendors and maintain design and test documentation.
- Perform basic thermal, stress, and tolerance analyses.

Requirements

- Proficiency in 2D and 3D CAD software (SolidWorks preferred).
- Basic understanding of GD&T, engineering materials, and manufacturing processes.
- Strong analytical and communication skills, with a collaborative mindset.

Preferred Qualifications

- Internship or project experience in product design, robotics, or electronics.
- Exposure to ANSYS and Design for Manufacturing/Assembly (DFM/DFA) principles.

4. Jr. Firmware Engineer

Responsibilities

- Design, develop, and debug firmware for microcontroller-based systems.
- Collaborate with hardware teams on new hardware bring-up and system integration.
- Develop device drivers and interface with peripherals such as I2C, SPI, UART, GPIO, ADC, and PWM.
- Optimize firmware for performance, memory usage, and reliability.
- Conduct unit testing and Hardware-in-the-Loop (HIL) testing.
- Document firmware architecture, design decisions, and code.

Requirements

- Proficiency in C/C++ programming for microcontrollers such as ARM, AVR, and PIC.
- Experience with development environments such as Keil, STM32CubeIDE, MPLAB, or equivalent tools.
- Understanding of RTOS fundamentals and embedded debugging techniques.
- Familiarity with communication protocols such as UART, SPI, I2C, and CAN, along with basic circuit knowledge.

Good to Have

- Experience with IoT applications.
- Knowledge of BLE, Wi-Fi, and ZigBee technologies.
- Familiarity with Git version control.

Skills Required

→As per mentioned at above Job descriptions

Selection Process

1. Initial Screening Round (If Needed)
2. Assessment Test
3. Technical Interview
4. HR Interview

Eligibility Parameters

Education Qualification

ELECTRICAL
ENGINEERING,

Other Information

Eligible Branches: Mechanical Engineering, Electrical Engineering, and Computer Science (2027 Batch)

Number of Openings: 30

1. Full-Time Employment (CTC)

Total CTC: INR 4–5 LPA

2. Internship (6 Months)

Stipend: INR 8,000–10,000 per month

Internship Mode: Onsite (mandatory for the entire internship duration)

Expected Joining Date: 2 November 2026

Service Agreement

To ensure mutual commitment and provide a structured long-term learning and growth opportunity, selected candidates will be required to sign a **3-year service agreement (bond)** upon joining. This arrangement helps maintain continuity in project development while enabling employees to gain comprehensive exposure to multiple stages of product design, development, testing, and implementation.

As part of the service agreement process, candidates may be required to submit supporting documents as per company policy and management requirements.

About Company

At ATRI Solutions, they transform your ideas into reality with technology that works for you. Whether it's developing advanced embedded systems, building connected IoT solutions, or creating custom hardware, they provide end-to-end product development services designed to deliver impactful results that help your business grow. Their approach blends innovation with practicality, ensuring solutions that are seamless, reliable, and easy to integrate. From quality engineering to custom kiosk solutions, we ensure your technology stays ahead of the curve. Partner with ATRI Solutions—your trusted technology ally for digital transformation—and elevate your business with smart, effective technology.
