09:00 AM

Last Registration Date

10 Jun, 2026 - Wednesday

Venue

Auditorium, Tagore Building, Marwadi University

> Job Description

Job Profile

1. Backend Developer
2. Data Analyst
3. Frontend Developer
4. Mobile App Developer (Flutter)
5. Product Associate
6. QA Engineer

Package (CTC)

4 LPA

Work Location

Ahmedabad

Job Description

1) Backend Developer (Python, GoLang, Laravel (PHP), Node, Postgres, Redis, Kafka, SQS)

- Design and build secure, performant RESTful and event-driven APIs.
- Develop microservices and workers using Python, GoLang, Node.js, or Laravel.

- Model and manage data using PostgreSQL, including writing optimized SQL queries and migrations.
- Use Redis for caching and rate-limiting, and message queues like Kafka or AWS SQS for async jobs and event streaming.
- Write clean, testable code with proper error handling and logging.
- Work with DevOps and Infra teams to deploy and monitor services.

Tech Stack & Tools:

- Languages: Python, GoLang, PHP (Laravel), Node.js (Express.js/NestJS)
- Database: PostgreSQL, Redis
- Messaging: Apache Kafka, AWS SQS
- Frameworks: FastAPI, Django, Laravel, Express, NestJS
- Testing: Pytest, PHPUnit, Go Test, Mocha
- Monitoring: Grafana, Sentry
- Infra Tools: Docker, Git, GitHub Actions

2) Data Analyst

- Analyze large datasets using SQL, Pandas, and NumPy.
- Build dashboards using Power BI, Superset, or similar tools.
- Automate reporting and build data pipelines using Python.
- Present findings in clear, business-friendly formats.

Tech Stack & Tools:

- Python, Pandas, NumPy
- PostgreSQL, MySQL, BigQuery
- Power BI, Apache Superset
- Jupyter, Excel

3) Frontend Developer (Next.js, React.js)

- Develop scalable and high-performance web applications using Next.js and React.js.
- Build reusable components and front-end libraries using TypeScript, TailwindCSS, and Context API/Redux.
- Optimize page performance with SSR (Server Side Rendering) and static site generation features of Next.js.
- Implement pixel-perfect UI from Figma/Zeplin designs.
- Collaborate with APIs built in REST/GraphQL, handle auth flows, and manage secure sessions.
- Ensure cross-browser compatibility and mobile responsiveness.

Tech Stack & Tools:

- Core: Next.js, React.js, TypeScript, JavaScript (ES6+)
- Styling: Tailwind CSS, SCSS, Styled Components
- State Management: Redux, Zustand, Context API
- Testing: Jest, React Testing Library, Cypress
- Tooling: Vite, Webpack, ESLint, Prettier, Git

4) Mobile App Developer (Flutter)

- Develop cross-platform mobile apps using Flutter and Dart.
- Architect and implement apps following the MVVM architecture for clear separation of concerns.
- Handle API calls through custom interceptors using Interpol, ensuring secure and consistent request/response behaviour.
- Implement session management without relying on local DBs, maintaining user state efficiently in memory.
- Utilize Mixins to promote code reuse and modularization in UI and business logic.
- Centralize error parsing and handling for a consistent UX and improved debugging.
- Manage network and local data operations through a Repository pattern for scalability and testability.
- Structure models effectively with DTO (Data Transfer Object) management for seamless API integration.

Tech Stack & Tools:

- Languages & Frameworks: Flutter, Dart.
- Architecture & State Management: MVVM, Riverpod (Hooks preferred), Provider (where needed).
- Network & API: Dio, Retrofit, Interpol for interceptors.
- Data Handling: SharedPreferences (if needed), in-memory cache, DTO models.
- Testing & Quality: Mockito, Flutter Test, Widget Testing, Lint Rules.
- CI/CD & Tools: Git, GitHub, Bitrise/Fastlane (optional), Firebase for analytics/crash reporting.

5) Product Associate

- Understand business problems and user needs.
- Help document product requirements, workflows, and feature details.
- Coordinate with engineering and business teams during feature development.
- Test new features and report bugs/issues.
- Track product tasks, timelines, and feature progress.
- Collect user feedback and help improve product experience.
- Create SOPs, user guides, and process documentation.
- Participate in brainstorming and product improvement discussions.
- Strong interest in Product Management, Technology, Operations, or Startups.
- Comfortable using tools like Google Sheets, Excel, Notion, or similar tools.
- Basic understanding of apps/software systems is a plus.

What You'll Learn

- Product Management fundamentals.
- Requirement gathering and documentation.
- Working with developers and tech teams.
- Product testing and release management.
- Business workflow optimization.
- Startup execution and problem-solving.

Preferred Qualities

- Curious mindset and willingness to learn.
- Good attention to detail.
- Strong ownership and accountability.
- Ability to work in a fast-paced environment.
- Interest in technology and business processes.

6) QA Engineer (Manual + Automated Testing)

- Create and execute test cases (manual & automated) across platforms.
- Write test scripts using tools like Selenium, Cypress, or Postman.
- Identify, log, and track bugs, and ensure timely fixes.
- Collaborate with dev teams in agile sprints for continuous testing.

Tech Stack & Tools:

- Selenium, Cypress, Playwright
- Postman, Swagger
- JIRA, TestRail
- Git, CI/CD tools (GitHub Actions, Jenkins)

Skills Required

→ Good communication and problem-solving skills.

→ Ability to think logically and learn quickly.

Selection Process

1. Aptitude Test 2. Technical Test 3. HR Round

➤ Eligibility Parameters

Other Information

Eligible Branch: CS Streams, MCA - 2026 batch

Training & Probation Period: Full time 6 to 9 months (Based on performance)

Stipend during training: Rs. 15,000 Per month

Joining: Immediate

Bond: No Bond but need to give commitment of minimum 1 year.

About Company

Medkart, A Service to the Society.

Its an initiative to let people know the real meaning of Generic Medicines.

They are a a chain of pharmacies in India that focuses on selling generic medicines along with other health and wellness products.

They exist to spread awareness of what Generic medicines truly are and correcting the myths surrounding around them so you choose wisely and not get caught up in the game of focusing on brand names.
