**Work Location**

Ahmedabad

Job Description**1. .NET Developer****Responsibilities**

- Write clean, scalable, and maintainable code using modern backend technologies such as **.NET (C#)** and **Java**.
- Manage and maintain the codebase using version control tools such as **Git** and **Azure DevOps**, ensuring collaborative development practices.
- Design, develop, implement, and maintain **RESTful APIs** and web services for integration with frontend applications and third-party systems.
- Work with relational databases (RDBMS) such as **SQL Server** to design database schemas, write efficient SQL queries, and manage data transactions.
- Debug and troubleshoot backend issues to ensure system reliability, scalability, and performance.
- Collaborate with frontend developers, product managers, and QA teams to ensure seamless product delivery.
- Participate in code reviews and contribute to coding standards and best practices.
- Optimize backend processes for speed, efficiency, and scalability.
- Stay up to date with emerging technologies and recommend improvements to the backend architecture.

Key Skills

- Proficiency in backend programming languages such as **C#, Java, or C++**.
- Strong understanding of RDBMS concepts, SQL queries, stored procedures, and database design.
- Experience in developing and consuming RESTful APIs.
- Familiarity with version control tools such as **Git** and **Azure DevOps**.
- Knowledge of application security, data protection, and performance optimization.
- Strong analytical, problem-solving, and debugging skills.
- Good understanding of the **Software Development Life Cycle (SDLC)** and **Agile methodologies**.

2. React Developer (Full Stack)

Responsibilities

- Design client-side and server-side application architecture.

- Design, develop, and maintain both frontend and backend components of web applications.
- Build responsive and visually appealing user interfaces.
- Develop and manage efficient databases and web applications.
- Test software to ensure responsiveness, efficiency, and reliability.
- Implement responsive designs for optimal performance across multiple devices.
- Troubleshoot, debug, maintain, and upgrade software.
- Implement security and data protection measures.
- Build mobile-responsive features and applications.
- Prepare and maintain technical documentation.
- Collaborate with data scientists and analysts to improve software functionality.
- Stay up to date with emerging technologies and industry trends.

Key Skills

- Internship or project experience as a Full Stack Developer or a similar role.
- Experience in developing web and mobile applications.
- Familiarity with common Full Stack development technologies.
- Knowledge of frontend technologies including **HTML, CSS, JavaScript, XML, and jQuery**.
- Knowledge of backend languages such as **C#, Java, and Python**.
- Experience with JavaScript frameworks/libraries such as **React.js, Angular, and Node.js**.
- Experience with **RESTful APIs** and/or **GraphQL**.
- Understanding of **CI/CD pipelines** and deployment tools.
- Familiarity with databases such as **MySQL** and **MongoDB**, web servers like **Apache**, and basic UI/UX principles.
- Excellent communication and teamwork skills.
- Strong attention to detail and organizational skills.

3. Technical Support Executive (SQL).

Responsibilities

- Provide technical support and software training through phone calls, remote sessions, and online meetings.
- Test new software releases and provide feedback for product improvements.
- Build and maintain strong, long-term relationships with clients.
- Install software and provide user training to clients.
- Attend training sessions as required.
- Respond to customer support requests and provide timely resolutions.
- Complete assigned tasks within the estimated timelines.
- Knowledge of **SQL** and **Crystal Reports** will be an added advantage.
- Report daily activities to the Support Manager.
- Take on additional responsibilities as required based on business needs and performance.

Key Skills

- Ability to write and execute basic as well as advanced SQL queries.
- Proficiency in SQL operations including **SELECT, INSERT, UPDATE, DELETE**, and data manipulation.
- Good understanding of SQL joins (**INNER, LEFT, RIGHT, FULL**) and subqueries.
- Ability to diagnose issues based on system errors and user-reported problems.
- Knowledge of software configuration and customization according to client requirements.
- Strong listening and communication skills to understand and resolve customer issues effectively.
- Good time management and the ability to prioritize multiple support requests.

4. Business Development Executive (BDE) / ERP Implementation Executive

Responsibilities

- Identify and develop new business opportunities through market research, cold calling, lead generation, field visits, and direct marketing.
- Follow up on inquiries and leads received through SoftwareSuggest, Justdial, IndiaMART, and other business portals.
- Schedule and conduct product demonstrations.
- Follow up with prospects and collect customer feedback.
- Build and maintain long-term relationships with clients.
- Respond promptly and professionally to customer inquiries, requests, and complaints.
- Prepare marketing and sales documentation.
- Conduct product and service reviews after implementation.
- Develop customer retention strategies.
- Implement marketing initiatives to acquire new customers.
- Provide pre-sales and post-sales support whenever required.
- Prepare weekly and monthly sales reports for individual team members.
- Report daily business activities directly to the Managing Director (MD).
- Perform additional responsibilities as assigned based on business requirements and performance.

Key Skills

- Excellent verbal communication and presentation skills.
- Ability to write professional emails, proposals, and reports.
- Strong listening skills to understand customer requirements and respond appropriately.
- Ability to establish and maintain strong client relationships.
- Basic negotiation and persuasion skills.
- Ability to conduct market research and identify potential business opportunities.
- Basic analytical skills for interpreting sales and market data.
- Familiarity with CRM software such as **Salesforce** or **HubSpot** for managing leads and customer interactions.
