Job Profile

1. AI/ML Engineer
2. Frontend Developer
3. Backend Developer
4. Growth Analyst –
Digital Marketing

Package (CTC)

4.2 to 8.0 LPA

Work Location

Surat

Job Description

1. AI/ML Engineer:

An AI/ML Engineer designs, develops, deploys, and maintains machine learning models and AI-powered applications.

Key Responsibilities

- Collect, clean, and prepare data for model training.
- Develop and train machine learning and deep learning models.
- Evaluate model performance and improve accuracy.
- Deploy models to production environments.
- Build and maintain ML pipelines and APIs.
- Monitor models for performance, drift, and reliability.
- Collaborate with data scientists, software engineers, and product teams.

Common Skills

Programming

- Python (most important)
- SQL
- Java, C++, or Go (depending on the project)

Machine Learning

- Supervised and unsupervised learning
- Deep learning
- Natural Language Processing (NLP)
- Computer Vision
- Reinforcement Learning (optional)

2. Frontend Developer

A Frontend Developer builds the user-facing part of websites and web applications—the interface that users see and interact with in a web browser.

Key Responsibilities

- Develop responsive web pages and user interfaces.
- Convert UI/UX designs into functional applications.
- Implement interactive features and animations.
- Optimize applications for performance and accessibility.
- Ensure cross-browser and cross-device compatibility.

- Integrate frontend applications with backend APIs.
- Debug, test, and maintain existing web applications.

Core Skills

Web Fundamentals

- HTML5
 - CSS3
 - JavaScript (ES6+)
 - Responsive Web Design
 - Accessibility (a11y)
-

3. Backend Developer

A Backend Developer builds and maintains the server-side logic, databases, APIs, and infrastructure that power web and mobile applications behind the scenes.

Key Responsibilities

- Design and develop APIs and backend services.
- Build business logic and application workflows.
- Design, manage, and optimize databases.
- Implement authentication and authorization systems.
- Improve application performance, scalability, and security.
- Integrate third-party services and payment systems.
- Write tests, monitor systems, and troubleshoot issues.

Core Skills

Programming Languages

- Python
- Java
- JavaScript/TypeScript (Node.js)
- C#

- Go

4. Growth Analyst – Digital Marketing

A Growth Analyst focuses on increasing user acquisition, engagement, retention, and revenue through data-driven marketing strategies. This role combines digital marketing, analytics, experimentation, and business insights.

Key Responsibilities

- Analyze marketing campaign performance across multiple channels.
- Track and optimize customer acquisition funnels.
- Monitor key metrics such as CAC, ROAS, CTR, conversion rate, and retention.
- Conduct A/B testing and growth experiments.
- Create dashboards and reports for stakeholders.
- Identify growth opportunities using customer and market data.
- Collaborate with marketing, product, sales, and data teams.

Core Skills

Digital Marketing

- Search Engine Optimization (SEO)
- Search Engine Marketing (SEM)
- Social Media Marketing
- Email Marketing
- Content Marketing
