Job Description

Key Responsibilities

- The role requires day-to-day client interactions through telephonic calls and remote sessions using AnyDesk or other remote support tools.
- Handle end-to-end software implementation, including installation, configuration, integration, defining policies as per client requirements, and obtaining project completion certification from clients.

- Train users both functionally and technically on various aspects of the company's software products.
- Provide technical support and basic Level 1 (L1) troubleshooting, along with ad hoc training to customers using the company's products. Respond to inbound customer queries effectively.
- Provide database support by troubleshooting issues using SQL queries and deploying new patches on UAT and production environments hosted on IIS servers.
- Ensure customer satisfaction by educating clients about product functionalities, features, and possible upgrades.
- Assist in product development and improvement by gathering customer feedback, identifying recurring issues, and coordinating with the Product Manager to address them.
- Maintain excellent service standards and go above and beyond to ensure customer satisfaction and retention.
- Escalate unresolved issues and queries to the appropriate departments for timely and accurate resolution.
- Work with ticket management systems to track, monitor, and resolve customer issues.

Required Skills

- Experience working with databases such as SQL, Oracle, or MS Access, software implementation, or ticketing tools will be an added advantage.
- Good understanding of computers, the internet, and IT concepts, with the ability to learn new technologies quickly.
- Basic knowledge of SQL/Oracle databases and the ability to write SQL queries for troubleshooting and error analysis.
- Basic knowledge of networking, Windows desktops/servers, IIS, and troubleshooting tools.
- Strong listening, analytical, and problem-solving skills.
- Customer-focused mindset with a strong service orientation.

Desired Personality Traits

- Soft-spoken, professional, pleasant, and presentable, with the ability to effectively manage both small and large clients.
- Technically and logically strong.
- Excellent analytical, problem-solving, and interpersonal skills.

- Strong work ethic and commitment to responsibilities.
- Ability to manage and balance multiple priorities effectively.

Key Result Areas (KRAs)

- Customer satisfaction and retention of assigned clients.
- Effective analysis, understanding, and resolution of customer problems and queries.
- Successful software implementation and user adoption.
- Timely issue resolution and escalation management.
- Continuous improvement through customer feedback and proactive support.
