Surat (Ichhapore – Hazira)

Job Description

1. DevOps Developer:

Key Responsibilities

- Assist in building and maintaining **CI/CD pipelines** (Continuous Integration/Continuous Deployment).
- Automate repetitive tasks using scripting languages such as **Python, Bash, or PowerShell**.

- Support cloud infrastructure on platforms like Amazon Web Services, Google Cloud, or Microsoft.
- Monitor application performance and system health.
- Help manage containers using tools like Docker and Kubernetes.
- Work with version control systems such as Git.
- Assist in configuring servers, networks, and deployment environments.
- Collaborate with developers to troubleshoot deployment and infrastructure issues.

Skills Typically Required

- Basic knowledge of **Linux/Unix** commands.
- Understanding of **networking fundamentals** (HTTP, DNS, TCP/IP).
- Familiarity with **Git** and software development workflows.
- Basic scripting in Python, Bash, or Shell.
- Understanding of cloud computing concepts.

2. Database Administration (DBA):

Key Responsibilities

- Monitor database performance and health.
- Assist with database installation, configuration, and upgrades.
- Perform database backups and recovery operations.
- Manage user accounts, permissions, and security settings.
- Write and optimize SQL queries.
- Help troubleshoot database issues and outages.
- Support database migration and maintenance activities.
- Generate reports and analyze database usage.

Technical Skills

- SQL (queries, joins, indexes, views, stored procedures)
- Database design and normalization
- Backup and recovery concepts
- Linux/Windows server basics
- Basic scripting (Python, Bash, PowerShell)
- Database security fundamentals
- Performance tuning basics
