Campus by Streebo Solutions Pvt. Ltd.
26-27 Batch **Company Campus Drive Details** **Company Name**
Streebo Solutions Pvt. Ltd. **Type of Company**
MNC Level **Campus Date & Time**
30 Jun, 2026 - Tuesday 09:00
AM **Last Registration Date**
23 Jun, 2026 - Tuesday**Venue**

Will be declared soon

Job Description **Job Profile**
1. Software Developer
(Java & AI-ML)
2. Business Analyst (Techno functional)
3. Quality Analyst **Package (CTC)**
4.5 to 6 LPA **Work Location**
Work from Home (Remote)**Job Description****1. Developer (Java & AI/ML).**

Role Overview: Streebo works with cutting-edge technologies, including Artificial Intelligence (AI), Machine Learning (ML), ChatGPT, Conversational AI, Blockchain, and Cloud Computing. The Developer will be responsible for designing, developing, testing, and maintaining web, mobile, and chatbot applications using modern technologies and frameworks.

Key Responsibilities

- Design, develop, test, and deploy web, mobile, and chatbot applications.
- Work on AI/ML-based solutions, including Natural Language Processing (NLP), Conversational AI, and ChatGPT integrations.
- Develop scalable, secure, and high-performance applications using modern frontend and backend technologies.
- Collaborate with cross-functional teams to deliver innovative technology solutions.
- Stay updated with emerging technologies, industry trends, and best practices.
- Participate in code reviews, debugging, and performance optimization activities.

Required Skills

- Frontend Technologies
- Backend Technologies
- Mobile & Hybrid App Development
- Emerging Technologies
- Cloud Platforms

Candidate Profile

- Strong passion for technology and innovation.
- Excellent analytical and problem-solving skills.
- Quick learner with the ability to adapt to new technologies.
- Strong programming fundamentals and technical aptitude.
- Self-motivated and eager to work in a fast-paced technology environment.

2. Business Analyst (Techno-Functional)

Role Overview

The Business Analyst will act as a bridge between business stakeholders and technical teams, ensuring that business requirements are effectively translated into technology solutions. The role involves requirement gathering, analysis, documentation, solution validation, and project support throughout the software development lifecycle.

Key Responsibilities

- Act as a liaison between business stakeholders and technical teams.

- Gather, analyze, and document business and technical requirements for web, mobile, and chatbot applications.
- Translate business requirements into functional specifications, user stories, workflows, and process diagrams.
- Participate in solution design discussions and ensure alignment between business needs and technical feasibility.
- Conduct gap analysis, impact analysis, and risk assessments.
- Prepare and execute User Acceptance Testing (UAT) plans, test cases, and validation activities.
- Coordinate with stakeholders to obtain sign-off on deliverables and releases.
- Collaborate with Product Managers, Architects, and Development Teams to prioritize requirements and manage feature backlogs.
- Support project implementation, deployment, and post-launch issue resolution.
- Monitor project progress and contribute to continuous process improvement initiatives.

Candidate Profile

- Strong analytical and problem-solving skills.
- Excellent communication and stakeholder management abilities.
- Good understanding of the Software Development Life Cycle (SDLC) and Agile methodologies.
- Ability to bridge business requirements with technical solutions.
- Experience in requirement gathering, documentation, and process modeling.
- Familiarity with web, mobile, chatbot, AI, and cloud-based solutions is preferred.

3. Quality Analyst (QA)

Role Overview

We are looking for enthusiastic and detail-oriented fresh graduates to join our team as Quality Analysts. The selected candidates will be responsible for ensuring the quality, reliability, and performance of web, mobile, and software applications through systematic testing and validation processes.

Key Responsibilities

- Understand project requirements, business workflows, and functional specifications.
- Prepare and execute test cases, test scenarios, and test scripts.
- Perform manual testing of web, mobile, and desktop applications.
- Identify, document, track, and report software defects using defect-tracking tools.
- Verify bug fixes and conduct regression testing.
- Collaborate with Developers, Business Analysts, and Project Managers to resolve issues.
- Ensure applications meet quality standards before release.
- Participate in User Acceptance Testing (UAT) and support stakeholders during testing activities.
- Maintain testing documentation and prepare quality reports.
- Continuously learn and adopt new testing methodologies, tools, and best practices.

Required Skills

- Basic understanding of Software Testing and Quality Assurance concepts.
- Knowledge of the Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC).
- Familiarity with manual testing techniques and defect-reporting processes.
- Basic understanding of web and mobile applications.
- Strong analytical and problem-solving skills.
- Good written and verbal communication skills.
- Strong attention to detail and a quality-focused mindset.

Candidate Profile

- Eagerness to learn and grow in the field of software testing and quality assurance.
- Strong sense of ownership and accountability.
- Ability to work effectively in a team environment.

- Positive attitude and willingness to adapt to new technologies and processes.

Skills Required

→As per mentioned at above job descriptions
