> Job Description

Job Profile

1. QA Engineer

Package (CTC)

3 LPA

Work Location

Ahmedabad, Rajkot

Job Description

You will be trained to use AI for improving testing efficiency, reducing manual effort, and ensuring high-quality product delivery.

Manual & Functional Testing

- Execute test cases and identify bugs in web applications.
- Validate functionality, UI/UX, and workflows.

AI-Driven Testing & Automation

- Use AI tools (e.g., ChatGPT or similar) to:
- Generate test cases

- Create test scenarios
- Improve bug analysis
- Assist in automating repetitive QA tasks

Test Case Design

- Design and maintain structured test cases based on requirements
- Use AI-assisted approaches for faster test creation

Defect Management

- Identify, document, and track bugs
- Collaborate with developers for resolution

eCommerce & Product Testing

- Test real-world workflows related to eCommerce platforms
- Ensure smooth user experience across modules

Documentation & Reporting

- Maintain test reports and QA documentation
- Suggest improvements in testing processes

Good to Have

- Exposure to eCommerce platforms
- Basic knowledge of APIs or databases
- Familiarity with AI tools like ChatGPT
- Curiosity about automation and new technologies

Skills Required

- Basic understanding of software testing concepts
- Strong analytical and problem-solving skills
- Attention to detail and logical thinking
- Good communication skills (English)
- Willingness to learn AI tools and automation techniques

Selection Process

1. Task Submission
2. Aptitude Test
3. Technical Test
4. HR Round
