Job Description

Role & Responsibilities

- Develop software solutions using Microsoft's .NET framework to meet client requirements.
- Collaborate with team members on large and complex projects.
- Refactor and optimize existing code to ensure compliance with coding standards and best practices.
- Conduct code reviews to identify and resolve errors or omissions.

- Perform thorough testing to ensure applications are functional, reliable, and high quality.
- Ensure applications are visually appealing, user-friendly, and engaging.
- Deploy solutions and monitor their adoption by the target audience.
- Incorporate client feedback into future iterations and continuous improvements.
- Stay updated with the latest advancements in .NET, coding practices, and relevant technologies.

Skills Required

- Strong understanding of programming fundamentals, including Object-Oriented Programming (OOP), Data Structures, and Algorithms.
- Excellent communication skills. Candidates will work directly with global clients after completing their training.
- Self-motivated and proactive attitude.
- Quick learner with the ability to adapt to new technologies.
- Strong team player with excellent collaboration skills.
- Good analytical and problem-solving abilities.
