> Job Description

Job Profile

1. Backend Developer Intern
2. QA Intern

Package (CTC)

Backend Developer Intern: 4.0 to 6.0 LPA
QA Intern: 3.0 to 5.0 LPA

Work Location

Ahmedabad

Job Description

1. Backend Developer Intern

Responsibilities

- Write and maintain backend code using languages such as Java, Python, Node.js, Go, or C#.
- Develop, test, and maintain RESTful or GraphQL APIs.
- Design, implement, and interact with SQL or NoSQL databases.

- Debug, troubleshoot, and resolve backend issues.
- Write unit and integration tests to ensure code quality.
- Collaborate with frontend developers to integrate APIs.
- Use Git for version control and code management.
- Participate in code reviews, sprint planning, and team meetings.
- Optimize application performance, scalability, and security.

Skills Required

- Proficiency in at least one backend programming language (Java, Python, Node.js, Go, or C#).
- Understanding of data structures and algorithms.
- Knowledge of relational and NoSQL databases (e.g., MySQL, PostgreSQL, MongoDB).
- Familiarity with REST APIs, GraphQL, and HTTP methods.
- Basic understanding of authentication and authorization (JWT, OAuth).
- Working knowledge of Git and GitHub.
- Strong problem-solving and debugging skills.
- Good communication and teamwork abilities.

2. QA Intern

Responsibilities

- Execute test cases to verify application functionality.
- Identify, document, and report software defects.
- Retest resolved issues to verify bug fixes.
- Create and maintain test cases, test plans, and test documentation.
- Perform manual testing of web, mobile, and desktop applications.
- Assist in automation testing using appropriate testing tools (if required).
- Collaborate with developers, product managers, and senior QA engineers.
- Ensure software meets functional, performance, and quality requirements.

Skills Required

- Basic understanding of the Software Testing Life Cycle (STLC).
- Knowledge of the Software Development Life Cycle (SDLC).
- Understanding of testing types such as functional, regression, smoke, sanity, integration, and system testing.
- Strong attention to detail and analytical thinking.
- Basic SQL knowledge for database validation.
- Familiarity with bug tracking tools (e.g., Jira or Bugzilla).
- Good communication, documentation, and teamwork skills.

Skills Required

→As per mentioned at above job descriptions
