1. Data Research Intern
2. Mobile Development Intern

 **Package (CTC)**
CTC : 3.0 LPA to 4.20 LPA

 **Work Location**
Ahmedabad (On-site)

Job Description

Data Research Intern - Key Responsibilities:

- Collect, clean, and organize large datasets from internal and external sources.
- Lead generation through outbound approach (Cold calling, Cold emails and LinkedIn Outreach)
- Assist in designing and executing research studies, surveys, and data analysis frameworks.
- Perform quantitative and qualitative analysis to identify trends, patterns, and insights.
- Prepare detailed reports, dashboards, and visualizations to communicate findings clearly.

- Support the research team in literature reviews, competitor analysis, and market research.
- Maintain documentation of research methodologies, data sources, and analytical processes.
- Collaborate with cross-functional teams to understand data requirements and deliver timely outputs.
- Assist in validating data integrity and ensuring accuracy across all research deliverables.

Required Qualifications:

- Currently pursuing a Bachelor's or Master's degree in Statistics, Mathematics, Computer Science, Economics, Data Science, or a related field.
- Basic proficiency in data analysis tools such as MS Excel, Python (Pandas, NumPy), or R.
- Familiarity with data visualization tools such as Tableau, Power BI, or Matplotlib.
- Good analytical and problem-solving skills with attention to detail.
- Strong written and verbal communication skills in English.
- Ability to work independently as well as in a team environment.

Preferred Skills (Good to Have):

- Experience with SQL for database querying and data retrieval.
- Exposure to machine learning concepts or statistical modeling techniques.
- Prior project work, internship experience, or academic research in data analysis.
- Knowledge of research design principles and survey methodologies.
- Familiarity with tools such as Google Sheets, SPSS, or STATA.

Mobile App Development Intern - Responsibilities :

- End-to-End Feature Ownership: Architect, develop, and ship core mobile features from scratch for either our iOS app (Swift/SwiftUI) or Android app (Kotlin/Jetpack Compose).
- Beta Phase Iteration: Closely monitor user feedback from the active beta test, rapidly troubleshooting, debugging, and optimizing the app to stabilize real-world usage.
- Zero-Lag Engineering: Prevent crashes, eliminate performance bottlenecks, reduce latency, and ensure fluid screen transitions across heavy data feeds, listing layouts, and interactive mapping features.
- Implement Seamless UI/UX: Translate Figma wireframes into highly responsive native layouts, optimizing property search filters, user dashboards, and media asset rendering.

Skills Required :

- Fundamental understanding of Flutter is required.
- Foundational knowledge of Swift or Kotlin is a plus (good to have).
- A preference for Master's level candidates; high academic achievement is valued alongside an uncompromising attitude toward quality.
- Strong AI domain expertise is mandatory. Experience in "vibe coding"—

collaborative development using AI-powered tools and agents—is essential.

- Comfortable working in AI-SDLC development environments.
- Practical familiarity with Git workflows, REST APIs, and core mobile lifecycle concepts.
- A proactive, problem-solving mindset suited for iterating fast during a live product beta test.

About Company

Since 2004, we've offered clients the best possible medical transcription experience using Mediscribes industry-leading dictation applications and transcription. In 2010, we expanded our scope of services to offer other "ez" solutions for coding (ezCAC), clinical documentation (ezCDI) and auditing (ezAssess). Our goal is to consistently deliver solutions that allow healthcare organizations to adapt to and meet the demands of a radically changing health information management landscape. Our multi-national team of experts understand the challenges facing the healthcare industry and have a passion for getting things done right.
