Job Description

1. OSINT Analyst

JOB DESCRIPTION

We are seeking a motivated and detail-oriented OSINT Analyst to join our cybersecurity and intelligence team. This role is designed for candidates who are passionate about open-source intelligence, cyber threat analysis, and investigative research. The selected candidate will work under the guidance of senior analysts and engineers, contributing to OSINT tool development, threat intelligence research, and technical documentation, while gaining hands-on exposure to real-world cybersecurity operations.

KEY RESPONSIBILITIES

- Assist in the development and enhancement of OSINT & GEOINT tools and internal platforms
- Support the preparation of technical reports, research findings, and documentation
- Learn and apply programming languages and frameworks such as Python, JavaScript, and React
- Exploring the deepweb for new techniques and tools.
- Participate in threat intelligence gathering, analysis, and reporting
- Conduct structured online research to identify cyber threats, digital footprints, and open-source indicators
- Collaborate with team members on investigative projects and security research tasks

REQUIRED SKILLS & COMPETENCIES

- Up-to-date on current Geopolitical affairs, emerging techniques in OSINT techniques.
- Ability to work collaboratively in a team-oriented environment
- Basic understanding of (Cybersecurity fundamentals, Networking concepts ,Common cyber threats (malware, phishing, ransomware, etc.)
- Strong analytical, research, and critical-thinking abilities
- Ability to communicate technical concepts clearly and concisely
- Proficiency in English with strong written and verbal communication abilities
- Self-Reliant, passionate and inquisitive about global affairs, geopolitics, and ongoing learning.

ADDITIONAL SKILLS

- Familiarity with OSINT methodologies and tools (Apart from Mainstream)
- Knowledge of setting up their own crawlers based on the requirements.
- Basic experience with Python, Bash scripting, or automation
- Exposure to networking tools and command-line environments
- Privacy-focused and patriotic mindset.

2. Research Analyst

JOB DESCRIPTION

We are seeking a Research Analyst to support our research and knowledge development initiatives. This role is focused on systematic research, data analysis, documentation, and report preparation across Geopolitical and cybersecurity-related domains. The ideal candidate should have a strong interest in research-driven work, structured analysis, and written communication, with the ability to convert complex information into clear, accurate, and well-documented research outputs.

KEY RESPONSIBILITIES

- Conduct structured research using open, academic, technical, and industry sources

- Collect, organize and validate data from multiple credible sources
- Analyse research findings to identify trends, insights, and patterns
- Prepare research reports, whitepapers, case studies, and documentation
- Support senior researchers in long-term research projects
- Assist in creating presentations, briefs, and internal knowledge material
- Ensure accuracy, clarity, and consistency in all research deliverables

REQUIRED SKILLS & COMPETENCIES

- Strong research, analytical, and critical-thinking skills
- Excellent written and verbal communication in English
- High attention to detail and ability to work with structured documentation
- Ability to understand and summarise technical and complex topics
- Good organizational and time-management skills
- Ability to work independently and collaboratively in a research environment
- Should be well-versed in analyzing and fact-checking the news to differentiate facts from hoaxes.

ADDITIONAL SKILLS

- Prior experience in academic, technical, or industry research
- Familiarity with research methodologies and documentation standards
- Basic understanding of Global Affairs, Current Affairs, Geopolitics
- Experience with data analysis, spreadsheets, or basic scripting
- Exposure to writing blogs, reports, or technical documentation
