> Job Description**Job Profile**

1. Python Developer (AI/ML Engineer)
2. Python Django Developer
3. Front End Developer

**Package (CTC)**CTC : Business Developer
Executive : 2.4 to 3.4 LPA**Work Location**

Rajkot

Job Description**Python Developer (AI/ML Engineer) :****Job Description**

We are seeking a highly motivated and analytical Machine Learning Developer to build, deploy, and maintain intelligent systems. As a 2026-ready ML engineer, you will not only design statistical models but also harness state-of-the-art AI

development tools to optimize your engineering workflows and accelerate data pipelines.

Responsibilities:

- **Model Development:** Design, implement, and maintain machine learning models and statistical algorithms to solve complex business problems.
- **Data Engineering:** Build and manage scalable data processing pipelines, ensuring data cleanups and transformations are highly efficient.
- **Data Analysis:** Analyze large, complex datasets to extract predictive insights and guide architectural choices.
- **Smart Engineering:** Integrate AI-assisted programming tools into your daily workflow to write script automation, troubleshoot model errors, and refactor code quickly.
- **Evaluation & Optimization:** Evaluate model accuracy using proper validation frameworks and continuously optimize algorithms for production performance.
- **Team Synergy:** Collaborate with data scientists, backend engineers, and product stakeholders to deliver high-quality, end-to-end ML solutions.

Required Skills :

- **Programming:** Strong core programming skills in Python; functional knowledge of C/C++ is a distinct advantage.
- **ML Frameworks:** Familiarity with popular machine learning and deep learning libraries such as TensorFlow, Keras, or PyTorch.
- **Data Science Toolkit:** Hands-on experience with foundational libraries like pandas, NumPy, and scikit-learn.
- **AI Tool Integration:** Familiarity with AI pair-programming assistants (e.g., GitHub Copilot, Cursor, or LLM-driven debugging workflows) to boost code output and problem-solving.
- **Core Concepts:** Clear understanding of core ML concepts: linear/logistic regressions, decision trees, random forests, and foundational neural networks.
- **Communication:** Excellent verbal and written communication skills with an ability to explain complex technical approaches clearly.

Python Django Developer :

Job Description

We are looking for a talented and adaptable Fresher Python Django Developer who is passionate about building high-performance, secure, and scalable web applications. We value candidates who combine classic backend engineering principles with modern AI-driven coding methodologies to deliver clean code quickly.

Responsibilities

- **Backend Development:** Write high-quality, reusable, and scalable backend code using Python and the Django framework.
- **API Architecture:** Design, implement, and maintain secure RESTful APIs for frontend integration.
- **Workflow Acceleration:** Use modern AI programming assistants to generate

boilerplate code, optimize Django ORM queries, and rapidly troubleshoot runtime errors.

- **Database Management:** Work with relational databases to write optimized SQL queries and manage migrations efficiently.
- **System Debugging:** Actively troubleshoot, debug, and patch application features to maintain high application uptime.
- **Deployment & Docs:** Assist in configuring and deploying web applications to cloud servers while maintaining rigorous technical documentation.

Skills Required :

- **Framework Mastery:** Strong conceptual understanding of Python and the Django framework (including MVC/MVT architecture, middleware, and ORM).
- **AI Tool Literacy:** Comfort with integrating AI development tools (such as GitHub Copilot, Claude, or Cursor) into your coding environment to write code faster and smarter.
- **Web Basics:** Foundational knowledge of frontend technologies like HTML5, CSS3, and JavaScript.
- **Version Control:** Familiarity with Git and standard collaborative workflows (GitHub/GitLab).
- **Databases:** Sound understanding of Relational Database Management Systems (RDBMS) like PostgreSQL or MySQL, along with structured SQL knowledge.

Preferred Skills:

- Familiarity with cloud services like AWS, GCP, or Docker containerization.
- Exposure to modern frontend frameworks such as React, Angular, or Vue.
- Personal coding portfolios or active GitHub repositories demonstrating live backend projects.

Front End Developer :

Job Description

We are looking for a forward-thinking, enthusiastic Fresher Front End Developer to join our engineering team. In this role, you will leverage modern development practices including cutting-edge AI coding assistants to build responsive, intuitive, and highly performant web applications.

Responsibilities

- **UI Development:** Develop user-friendly, responsive web applications using React.js and modern CSS frameworks.
- **Collaboration:** Partner with cross-functional teams (designers, backend developers) to gather requirements, map out UI flows, and implement robust solutions.
- **AI-Assisted Workflows:** Utilize modern AI coding tools to accelerate boilerplate generation, optimize component rendering, and streamline the debugging process.

- **Code Quality:** Write clean, maintainable, and well-documented code. Participate in constructive peer code reviews and implement unit tests.
- **Performance Optimization:** Optimize web applications for maximum speed, scalability, and cross-browser reliability.
- **Continuous Learning:** Stay ahead of the curve with evolving frontend ecosystems, tools, and best practices.

Skills Required

→ Kindly refer Job Description

Selection Process

1. Technical Interview
2. HR Round

➤ Eligibility Parameters

Education Qualification

COMPUTER
ENGINEERING,
INFORMATION
TECHNOLOGY,
INFORMATION AND
COMMUNICATION
TECHNOLOGY, COMPUTER
ENGG. ARTIFICIAL
INTELLIGENCE,
BIOINFORMATICS

Eligibility Criteria

No percentage cut off & Above
No Active Backlog

➤ To Participate

Registration Process

Registration Link : <https://forms.gle/ZZ2KyCfWW7RYNbfy7>

Placement Cell Contact Person

RIDDHI SHUKLA
Mob. : 6359701919

➤ Other Information

Eligible Branches : CS - All branches, MCA, MSc (Data Science) - 2027 Batch

Important Note :

Initial 6 Months will be of Internship Period. No stipend will be given during internship period.

After successful internship period CTC will be 2.4 to 3.4 LPA

 About Company

We are a leading Gen AI and AI development company that helps you overcome all challenges. We become your extended team that works passionately to help you transform and succeed. Whether you need AI-powered solutions or robust non-AI applications, our team excels in a wide range of technologies, including Augmented Reality (AR), Virtual Reality (VR), mobile app development, and web app development. From building scalable React web apps, immersive AR/VR experiences, to crafting high-performance mobile applications and integrating AI agents and automation, we deliver end-to-end solutions that fit seamlessly into your existing workflows.
