> Job Description

 **Job Profile**

1. AI/ML Engineer
2. Data Engineer
3. DevOps Engineer
4. Python Developer

 **Package (CTC)**
7.0 LPA **Work Location**
Ahmedabad

Job Description

1. AI/ML Engineer :

Job Summary

We are looking for enthusiastic and motivated fresh graduates to join our team as **AI/ML Engineers**. This role offers an exciting opportunity to learn and work on Machine Learning, Generative AI, and Data Science projects using AWS Cloud. If you are passionate about AI, possess strong Python skills, and are eager to explore cutting-edge technologies, we'd love to hear from you!

Key Responsibilities

- Learn and assist in building AI/ML applications using Python and AWS Cloud services.
- Support the development of Generative AI applications under the guidance of senior engineers.
- Gain hands-on experience with frameworks such as LangChain, LangGraph, and CrewAI.
- Assist in developing prompt engineering techniques to extract structured information from unstructured data.
- Work with AWS services such as S3, Lambda, Bedrock, and SageMaker for AI/ML solutions.
- Help train, test, and evaluate machine learning models.
- Collaborate with team members to integrate AI/ML features into applications.
- Participate in monitoring, maintaining, and troubleshooting deployed AI/ML models.

Skills & Qualifications

- Strong knowledge of Python programming.
- Basic understanding of machine learning concepts, including data preprocessing, model training, and evaluation.
- Familiarity with data science fundamentals such as data cleaning, analysis, and visualization.
- Awareness of Generative AI technologies (LLMs, ChatGPT, Gemini, etc.) is an advantage.
- Basic understanding of cloud computing concepts (AWS preferred).
- Strong analytical and problem-solving skills.
- Good communication and teamwork abilities.

Nice-to-Have

- Hands-on AI/ML or Data Science projects or internships.
- Familiarity with TensorFlow, PyTorch, or Scikit-learn.
- Exposure to LangChain, LangGraph, or CrewAI.
- Basic knowledge of APIs and web application integration.

- Certifications in AI/ML or cloud platforms (AWS, Azure, or GCP).
-

2. Data Engineer:

Job Summary

We are looking for enthusiastic and motivated fresh graduates who are eager to begin their careers in **Data Engineering**. If you are passionate about working with data, excited to learn modern data technologies, and interested in building cloud-based data solutions, we would love to hear from you.

Roles & Responsibilities

- Learn and assist in building data pipelines for data ingestion, processing, and analytics.
- Work with AWS services such as S3, Glue, Lambda, and Redshift.
- Gain hands-on exposure to ETL processes and support data migration and integration projects.
- Assist in designing and maintaining data models and data warehouse solutions.
- Write and optimize SQL queries for data extraction, analysis, and reporting.
- Work with relational databases (PostgreSQL, MySQL, SQL Server) and gain exposure to NoSQL databases (MongoDB, Cassandra, etc.).
- Support monitoring and troubleshooting of data pipelines under senior engineers' guidance.
- Learn big data and streaming technologies such as Apache Spark, Kafka, Kinesis, and Airflow.
- Maintain technical documentation and collaborate effectively with team members.

Desired Skills

- Strong knowledge of Python and SQL.
- Good understanding of relational and NoSQL database concepts.
- Basic understanding of cloud computing concepts (AWS preferred).
- Knowledge of data structures, algorithms, and problem-solving techniques.
- Eagerness to learn ETL, Data Warehousing, Big Data, and real-time streaming technologies.

- Good communication and teamwork skills.
 - Internship experience, academic projects, or certifications in Data Engineering, Cloud Computing, or Big Data will be an added advantage.
-

3. DevOps Engineer:

About the Role

We are looking for a motivated **Fresher DevOps Engineer** with a strong interest in cloud technologies, automation, and CI/CD processes. The ideal candidate should have basic knowledge of AWS services and a keen desire to build a successful career in DevOps. This is an excellent opportunity for fresh graduates to learn and grow in a fast-paced environment.

Key Responsibilities

- Assist in setting up and maintaining CI/CD pipelines.
- Support application deployment and monitoring on AWS Cloud.
- Work with the team to automate infrastructure using Infrastructure as Code (IaC) tools.
- Collaborate with developers and system administrators to resolve deployment and infrastructure issues.
- Learn and implement DevOps best practices, cloud operations, and security standards.
- Monitor system performance and participate in troubleshooting activities.

Required Skills

- Basic understanding of AWS services such as EC2, S3, IAM, VPC, RDS, and Lambda.
 - Knowledge of Linux/Unix operating systems and command-line tools.
 - Familiarity with Git/GitHub or other version control systems.
 - Basic understanding of CI/CD tools such as Jenkins, GitLab CI, or GitHub Actions.
 - Basic knowledge of Docker and Kubernetes.
 - Strong analytical and problem-solving skills.
 - Academic projects or internship experience in Cloud Computing or DevOps will be an advantage.
-

4. Python Developer :

Job Summary

We are looking for enthusiastic and motivated fresh graduates to join our team as **Python Developers**. The ideal candidate should have a solid understanding of Python fundamentals, strong problem-solving skills, and a passion for developing applications. If you are eager to learn modern frameworks, databases, and cloud technologies, this is an excellent opportunity to start your career.

Key Responsibilities

- Learn and assist in developing Python-based applications under the guidance of senior developers.
- Support the development of web applications using frameworks such as Django, Flask, or FastAPI.
- Work with relational databases (MySQL, PostgreSQL) and gain exposure to NoSQL databases.
- Write SQL queries for data retrieval and database management.
- Integrate and work with REST APIs.
- Learn and contribute to writing unit tests using Pytest or Unittest.
- Participate in debugging and resolving application issues with mentor support.
- Collaborate with team members, participate in code reviews, and follow coding best practices.

Skills & Qualifications

- Strong knowledge of Python programming fundamentals.
- Basic understanding of Django, Flask, or FastAPI.
- Familiarity with SQL databases (MySQL/PostgreSQL); knowledge of NoSQL databases is a plus.
- Understanding of REST APIs.
- Knowledge of HTML, CSS, and JavaScript is an added advantage.
- Familiarity with Git/GitHub for version control.
- Strong analytical and problem-solving abilities.

- Good communication skills and a collaborative mindset.

Nice-to-Have

- Knowledge of ORMs such as Django ORM or SQLAlchemy.
- Basic understanding of Docker, CI/CD pipelines, and cloud platforms (AWS, Azure, or GCP).
- Familiarity with unit testing concepts and frameworks.
- Interest in learning modern technologies such as Kubernetes, Kafka, and message queue systems.

Skills Required

→As per mentioned at above job descriptions

Selection Process

1. Initial Screening Round (If Needed)
2. Aptitude Test
3. Coding Test
4. Technical Interview
5. HR Interview

Other Information

Eligible Branch: CS Stream – 2027 Batch

Service Agreement: 18 Months (6 Months of Training + 12 Months of Employment)

Training Period: 6 Months with a stipend of **15,000 per month**

Month of Joining: Will be informed later.

Available Openings: 50+

Salary (Post-Training): 7 LPA

Job Location: Ahmedabad

About Company

Armakuni is a next-generation technology consultancy that combines the strengths of consulting and delivery to help organizations transform while continuing to meet their most critical business deadlines. The company specializes in modern, cloud-native engineering practices across software, infrastructure, and data, enabling businesses to respond quickly to evolving market demands and emerging technologies such as Artificial Intelligence (AI). Armakuni provides hands-on support to help organizations select and implement the right technologies, establish scalable engineering processes, and build high-performing engineering teams.
